

SIDRA HAYAT

Full-Stack & AI/ML Engineer

sidrahayat003@gmail.com · github.com/Sidra-Hayat · linkedin.com/in/sidra-hayat-cs · Okara, Pakistan

Sixth-semester Computer Science student who takes projects past the demo. I build with React and Node.js, deploy with Docker, Nginx and GitHub Actions, and released an offline Flutter scanner to Google Play on my own.

EXPERIENCE

AI & Machine Learning Engineering Intern — Devzey

Jul – Sep 2026

On-site, Okara, Pakistan

- Built REST APIs in **Express** with server-side validation behind a **React 19** frontend, writing the same record to **MongoDB** and **PostgreSQL** through Mongoose and Prisma.
- Shipped a streaming AI chat application that returns tokens as they arrive, with adjustable temperature and reasoning-effort controls.
- Deployed it myself — **Docker Compose** for three services on a Linux VPS behind **Nginx** with SSL, and a **GitHub Actions** job that redeployed on every push.

Android Developer — DocuAI

2026

Independent · published under Devzey · Google Play, closed testing

- Built an offline document scanner in **Flutter** with on-device **ML Kit OCR**, BM25-ranked search over a local Hive store and PDF export — everything runs on the handset.
- Handled the whole release: signed bundle, Play App Signing, data-safety declarations, store listing and testing tracks.

PROJECTS

CUI Room Scheduler — classroom booking system

Laravel · PHP · SQLite · PHPUnit

- A room is occupied if a recurring class or a pending booking overlaps the requested window, evaluated so back-to-back slots stay legal. Availability is re-checked at approval, so an admin cannot approve a stale request.
- Role-based admin and teacher access, timetable CRUD, and PHPUnit feature tests over the booking lifecycle.

AI StudyFlow Planner

JavaScript · Chart.js

- A priority algorithm that weighs subject difficulty against exam dates to generate daily study plans, with a progress dashboard. Live at flourishing-mochi-7b96f5.netlify.app.

Intrusion Detection System — in progress

Python · scikit-learn · Pandas

- Preparing real network-traffic data and training a Random Forest to separate normal connections from attacks. Currently working on validating that the model generalises rather than leaning on a leaking feature.

EDUCATION

BS Computer Science — COMSATS University Islamabad, Sahiwal

Feb 2024 – Jan 2028

CGPA 3.95 / 4.0 — 2nd in batch. Data structures & algorithms, OOP, database systems, software engineering, operating systems, web development, artificial intelligence.

TECHNICAL SKILLS

Languages & frontend Java, Python, JavaScript, PHP, Dart, SQL · React, Vite, Tailwind CSS, Flutter, Java Swing

Backend & data Node.js, Express, REST APIs, Laravel, MongoDB, PostgreSQL, Prisma, Mongoose, SQLite

DevOps & ML Docker, Docker Compose, Nginx, GitHub Actions, CI/CD, Linux VPS, Git, scikit-learn, Pandas, NumPy

Practice PHPUnit, Postman, OOP design, DSA, Agile/SDLC

PROGRAMS

Aspire Leaders Program — Aspire Institute (Harvard Business School faculty), Oct 2025.

Remote AI programs — CodeAlpha, Decode Labs, FlyRank Corp: generative AI and LLM workflows, 2026.
